

LM308MWS MODULAR WEAPON SYSTEM

The latest in the superior LMT™ product line. Regardless of application, the unique MRP™ system allows for flexibility. Quickly interchange barrels, stocks, sights and magazine - it's the next logical choice for the gas operated monolithic system.

The .308 Modular Weapon System is the weapon of choice for operators worldwide. The British Ministry of Defence realized, upon stringent evaluation of the Lewis Machine & Tool .308 MWS, that the .308 was best suited for the British Sharpshooter in Afghanistan. Further, the .308 MWS was crowned as their new L129A1 *Because Failure Is Not An Option*.

With superior reliability and flexibility that you want, and the knock-down power that you need, the LMT™ .308 MWS is in a class all its own.
